

SLC Metro Roofing — Project Handoff

Date: April 29, 2026

Status: Ads LIVE  — Pipeline LIVE  — **NOW: Land first contractor, then first lead**

Session 3 Wins (What Just Got Done)

Make.com — Instant Trigger Active

- "Sandy Roofing — Form → Notion + Email Alert" scenario is now set to **"Immediately as data arrives"**
- Root issue resolved: stale empty webhook record in queue was causing recurring BundleValidationError — deleted and cleared
- Every form submission on sandyroofingpros.com now instantly creates a Notion row + sends Gmail alert

Meta Ads — Campaign Live

- **Campaign:** "Sandy Roofing Pros — Lead Gen"
- **Account:** SandyRoofingPros (act=1712322076878327)
- **Objective:** Leads (Advantage+, score 100)
- **Budget:** \$15/day
- **Ad set:** "SLC Homeowners — Salt Lake County" (ages 30–65, Salt Lake County)
- **Creative:** roofer-working.jpg (two workers on roof, clear sky)
- **Status:** Processing → will flip to Active within a few hours
- **Ad copy used:**

Headline: Sandy's Local Roofing Experts — Free Estimates

Primary text: Roof damage in Salt Lake County? Whether it's storm damage, an emergency leak, or just time for an inspection — Sandy Roofing Pros connects you with trusted local roofers fast. Free estimates, no obligation.

Description: Serving Sandy, Draper, South Jordan, Murray, Midvale, West Jordan, and SLC. Get a local expert to call you today.

10-Step Playbook — Updated Status

Step	Owner	Status
1. Market Selection (Sandy, UT — roofing)	Jackson	✓ Done
2. Demand Validation	Jackson	✓ Done
3. Website Built	Sarah	✓ Done — live
4. Build BO List (10 contractors)	Noah	✓ Done
5. Outreach — get BO committed	Noah	● START NOW — highest priority

Step	Owner	Status
6. Launch Meta Ads (\$15/day)	Jackson	✅ Done — live
7. Evaluate Ads (~\$100 spend)	Jackson	⌚ ~7 days out
8. Handle Leads → send to BO	Jackson	Ready — pipeline live
9. Free Trial (monitor BO response)	Noah	Not started
10. Close BO (monthly retainer)	Noah	Not started

NEXT STEPS — This Week's Priority: Land a Contractor

The ads are running. Leads will come. **The only gap is having a roofer committed to receive them.** Noah needs to start calling the contractor list today — not after the first lead drops.

Step 1: Noah's Outreach Call Script

Goal of the call: Get a verbal "yes" to receive free leads this week. This is not a sales call — it's a trust-building call. Keep it under 2 minutes.

Opening:

"Hey, is this [Name]? My name is Noah — I help run a local roofing lead site here in Sandy. Do you have like 60 seconds?"

The offer:

"We just launched sandyroofingpros.com and we're starting to get homeowners reaching out for estimates. We're looking to work with one or two local contractors on a trial basis — completely free leads to start, no commitment, just want to see if it's a good fit for both sides. Would that be something you'd be open to?"

If yes:

"Perfect. What's the best number to text you leads on? I can have something to you as early as this week. One thing I'll need — if we send you a lead, can you commit to calling them back within an hour? That's really all we ask."

Confirm and close:

"Great. I'll follow up with a quick text to confirm your info. Looking forward to working with you."

Key objections and responses:

Objection	Response
"How much does it cost?"	"Nothing right now. We're doing a free trial with a handful of contractors. If the leads convert, we talk about a monthly arrangement later — but there's zero risk on your end to start."
"I already use Angi/HomeAdvisor"	"That's actually why I called you — those leads are shared with 3–5 other roofers. Ours go to one contractor only. No bidding war."
"I'm too busy right now"	"That's great — means your schedule is full. This is actually the right time to set it up so you have backup coming in when things slow down. Takes 30 seconds to get set up."
"Send me an email"	"Happy to — what's your email? I'll also text you the site link so you can see what homeowners are seeing."
"Not interested"	"No problem at all. Can I ask — is it the timing or just not a fit in general? [Listen] Thanks for the honesty, I appreciate it."

Step 2: Who to Call First

From the researched list of 10 contractors, prioritize in this order:

1. **Contractors already paying for Angi/HomeAdvisor** — they're already in "buying leads" mode, easiest pitch
2. **Contractors with weak websites or few reviews** — most to gain, least leverage to say no
3. **Skip:** Top 3-star Google Maps results — they're already winning organically and harder to convince

Target: Get 1 committed contractor by end of this week. One is all you need to start.

Step 3: What "Committed" Looks Like

Noah's goal isn't a signed contract — it's a verbal commitment with a confirmed phone number to receive leads. Specifically:

- Contractor has agreed to receive leads
- Noah has their name, business name, and callback phone number
- They've agreed to respond to leads within 1 hour
- This info gets added to the Notion "Assigned Partner" field

Once that exists, Jackson can manually route any incoming Notion lead to that contractor immediately.

Step 4: When the First Lead Comes In

When a form submission hits Notion:

1. Jackson gets Gmail alert from jacksonrsmith@gmail.com
2. Open the Notion Live Leads DB — the row will have: name, phone, service needed
3. Text or call the committed contractor immediately with: name, phone number, and what they're looking for
4. Log in Notion: set Status → "Contacted Partner", note which contractor received it
5. Follow up with the homeowner within 24 hrs to confirm they were contacted

This is the moment everything is working. Don't let a lead sit.

Step 5: Ad Monitoring (Jackson, ~7 Days Out)

After \$100 spend (roughly 7 days at \$15/day):

- **CPL < \$25** → Campaign is working, hold or scale to \$25/day
- **CPL \$25–\$50** → Acceptable for home services, test a new creative variation
- **CPL > \$50 or 0 leads** → Kill the ad set, test new copy or new image
- **Check:** Is delivery status "Active"? If still "Processing" after 48 hours, Meta may have flagged the creative — contact support

Step 6: Meta Pixel (Backburner — But Worth Doing)

To track which creative actually drives form submissions, the pixel needs to be on the site. This is Sarah's task.

- Get Pixel ID from Meta Business Manager
- Add pixel base code to `src/layouts/Layout.astro` in the GitHub repo
- Add a `Lead` event that fires on form submission success
- Until this is done, Meta is optimizing on click-throughs, not actual leads

Team Roles — Right Now

Person	Job This Week
Jackson	Monitor ads (check in 24 hrs for Active status), route first leads to contractor
Noah	Start contractor calls today. Goal: 1 committed BO by end of week
Sarah	Meta Pixel install on Astro site (backburner, but this week if possible)

What to Tell Claude in the Next Chat

Paste this at the start of the conversation:

"I'm running a roofing lead gen business in Sandy, UT at sandyroofingpros.com. Ads are live on Meta at \$15/day targeting Salt Lake County homeowners. The lead pipeline is fully operational (form → Make → Notion + Gmail). My next task is getting Noah active on contractor outreach to land our first committed BO. The contractor list has 10 researched roofers. Help me [choose one below]."

Then pick one:

1. "Build a Noah outreach tracker spreadsheet with the 10 contractors, call status, and follow-up dates"
2. "Help me write a text/email follow-up sequence Noah can use after the first call"
3. "My Meta ad has been running for X days — help me evaluate the performance data and decide what to do next"
4. "A lead came in — help me figure out how to handle it and route it to the contractor"
